

# Understanding Your Genetic and Non-Genetic Risks for Alzheimer's Disease

Once assumed to be unpreventable, risk of Alzheimer's disease is influenced by many factors, both genetic and non-genetic. And, we continue to learn about these factors as more and more research around the world is reported. During this presentation, you will learn about the ongoing quest of researchers and scientists to understand these modifiable risk factors and learn what the research says regarding the effect of lifestyle modifications on risk.

**Open to Community Members and Professionals**

## Presented by:

Anne Marie Morgan, MPH, CPT  
NorthShore University HealthSystem Center  
for Brain Health

Anne Marie Morgan is a Sr. Clinical Research Associate at NorthShore University HealthSystem and acts as project manager for the Center for Brain Health, whose mission is to preserve and improve brain health by preventing neurodegenerative disease.

Mrs. Morgan holds a masters degree in public health from the University of Illinois at Chicago, where she specialized in Gerontology, and Behavioral and Community Health Sciences.
